MANTRAILING

Kevin is able to deliver Introduction workshops, and regular progression sessions along with full-day or two-day workshops. Kevin Can also do assessments for Mantrailing Global Levels (please see the optional add-ons page for more information on these).

For full-day and two-day workshops, Kevin runs 9-4pm for the day and limits the teams to just six to allow him plenty of time to get to know the individual teams and aims for around 3/4 trails a day as he prefers to focus on quality over quantity.

All the workshops and/or sessions can be tailed to all different levels of teams.

If any attendees have special requirements which need to be met please contact us to ensure adjustments can be made before booking them on to the workshop.

Mantrailing training is based on the Mantrailing Global Method and those joining from other organisations need to be aware they will trail using the method while on the workshop.

SCENT DETECTION

Kevin is able to deliver Introduction workshops, and regular progression sessions along with full-day or two-day workshops. Kevin Can also run trials to test teams for either UK Sniffer Dogs or NNA, Kevin can also offer the NNA ORTs for anyone interested (please see the optional add-ons page for more information on these).

During the workshop/s, Kevin works with dogs one at a time to allow him to focus on each team and offer them any advice on problem-solving they need.
